01 WHY

Tonight, my book club has a watch party

The Community 2 just came out. At 22:00 tonight we each sit at home with popcorn and beer, press play together, and react in group chat.

Our invite even has a rule: **“If you’ve seen it, no spoilers!”**

© 2026 BuildnWrite. All rights reserved.

01 WHY

Why is this so much fun?

A new movie or drama is best on release night, when everyone watches at once and their takes go viral.

Watching and talking together doubles the fun.

01 WHY

The same need lives in live streaming

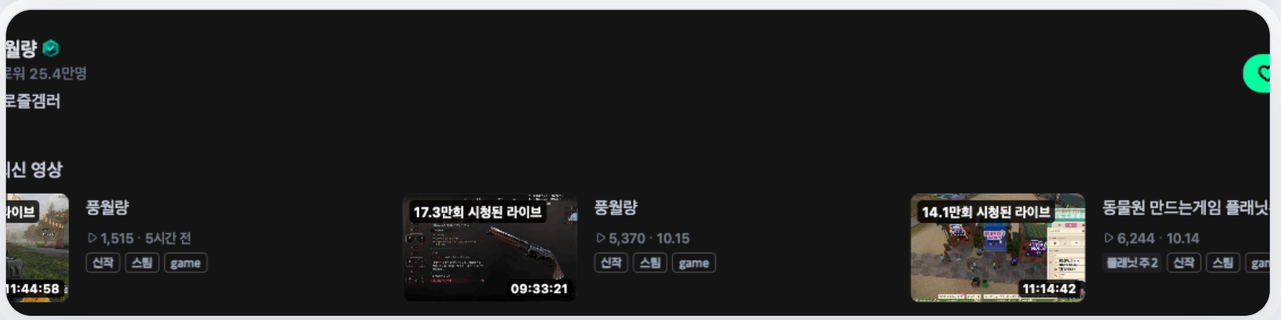

Live 9 to 13 hours a day

Every day needs new content. One streamer said finding it takes most of the prep.

So they watch together

Watching a show with chat is fun for viewers and fills the long hours.

I watch 풍월량 and 서새봄 on CHZZK every day.

01 WHY

That’s why watch-alongs exist

- Licensed watch-alongs since 2024-07
- Licensed sports, esports and shows
- Premieres: one time slot, live chat

01 PROBLEM

But chat spoils it

Streamers spend the show guarding the chat.

In the title

“스포금지” (no spoilers) written into a SOOP watch-along title

By hand

Mods are told to delete spoilers from chat

Our invite too

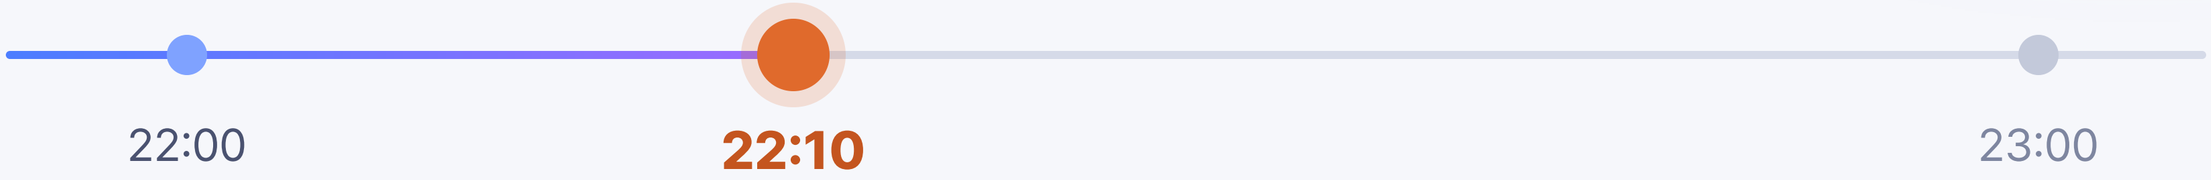

“If you’ve seen it already, no spoilers!”

01 PROBLEM

Not everyone makes it at 22:00

A parent joins at 22:10 after putting the kids to bed.

Late joiners usually just leave.

02 WHAT'S DIFFERENT

We spot spoilers by the scene a message talks about, not by when it was posted.

	Twitch	SOOP	YouTube Premieres	CHZZK	Watch Party Host
Watch together	X	O	O	O	O
Recap for late joiners	X	△ live now	X	X	O from the video
Answers only from what has aired	X	X	X	X	O
Chat matched to the video time	X	X	△ replay	X	O
Spoilers blurred by scene	X	X	X	X	O
Anyone hosts YouTube like TV	X	X	X	X	O

Public sources as of 2026-10-16, some notices unverified. SOOP recap follows the live moment. CHZZK Clean Bot filters abuse, not spoilers.

03 PRODUCT

Spoilers get blurred the moment they’re posted

A rewatcher types about a scene that hasn’t aired yet. Gemini finds that scene and **blurs the message as it arrives.**

Want to see it? **Click to reveal, your choice.** The blur clears by itself when that scene airs.

Blurred now; clears at 21:37 when that scene airs

04 HOW IT WORKS

One broadcast clock, two rules

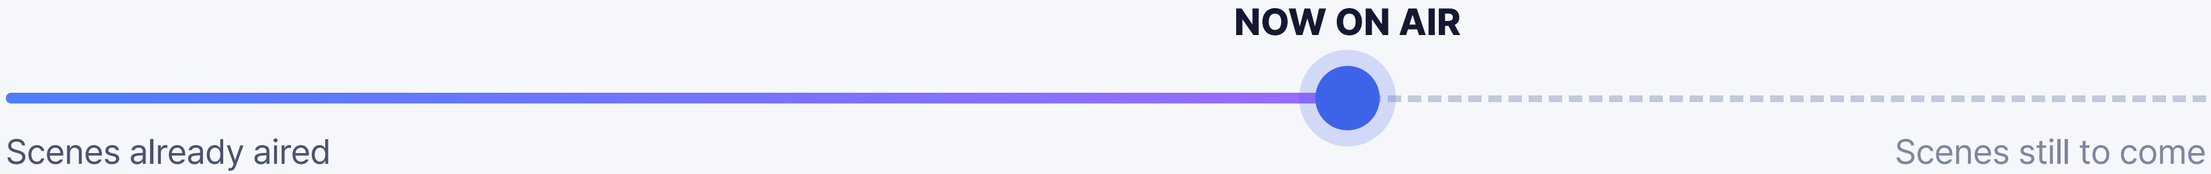

Gemini 4 Argon
watches the episode and writes a scene log

→

Flash re-checks
3 random clips per 5-minute part

→

Argon looks again
only where a check disagrees

Used for you
Catch-up and answers come only from scenes already aired.

Blurred until it airs
Chat about scenes not yet aired is blurred on arrival. Click to peek; it clears when the scene airs.
