Watch Party Host

Join late. Still watch together.

The AI manager for YouTube watch parties, built on Gemini.

Google DeepMind AI Hackathon, Seoul, 2026-10-16

01 WHY

Spider-Man: Brand New Day

Summer 2026. After the premiere, the post-credits scene leaked on social media, and fans were told to stay off it until they'd seen the film. **See it first, fast.**

Watching together is fun. Come late, and you get spoilers and lose the context.

01 WHY

The Community 2

A Korean survival reality show. Strangers with very different values live together and compete to stay.

Episodes 1 to 3 are free on YouTube.

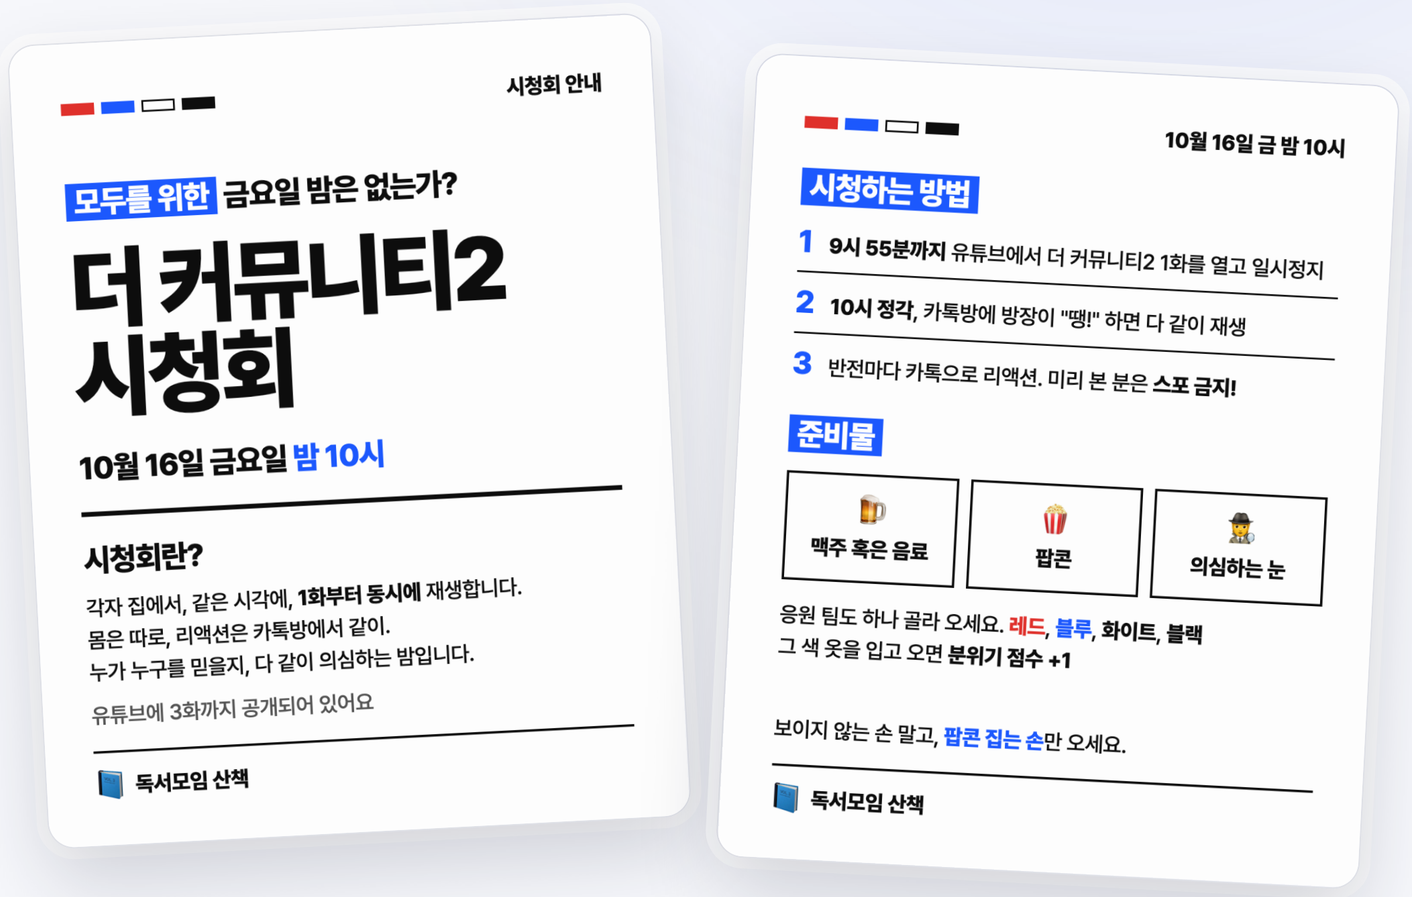

Poster and episode 1: wavve original

© 2026 BuildnWrite. All rights reserved.

01 WHY

My friends watch it tonight

My friends picked it, so I set up a watch party on the spot. At 22:00 tonight we each sit at home with popcorn and beer, press play together, and react in group chat.

Our friends' watch party invitation, 2026-10-16

© 2026 BuildnWrite. All rights reserved.

01 WHY

The demand already exists

Watching together is a culture. Live streamers call it a watch-along.

9 h 51 m

침착맨 × TVING watch-along

Up to ~50% live share on TVING

10 M

SOOP watch-along viewers

Cumulative, 3 months

760 K

CHZZK peak concurrent

2025 Worlds: official channel plus streamer watch-alongs

01 WHAT WE HEARD

What we heard

“If I join late, I usually just leave.”

Friend from our watch party, a parent

“Answering chat mid-lecture breaks my flow.”

Me, teaching live classes

Interviews, 2026-10-16 (paraphrased)

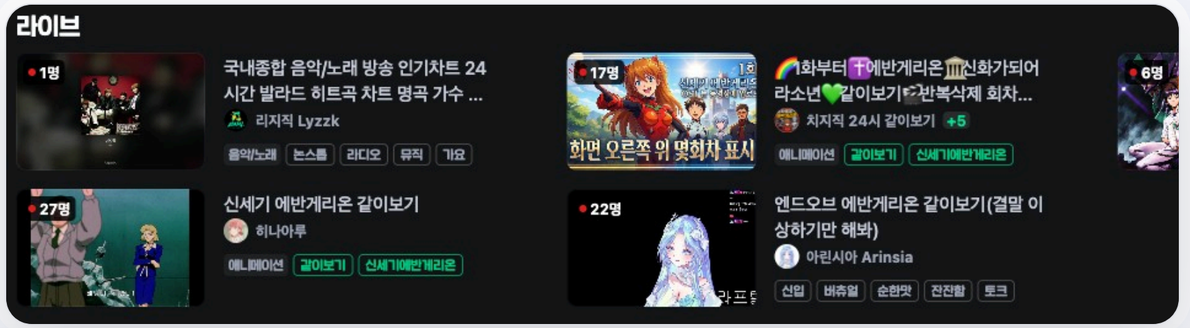

© 2026 BuildnWrite. All rights reserved.

01 WHO IT’S FOR

Who it’s for

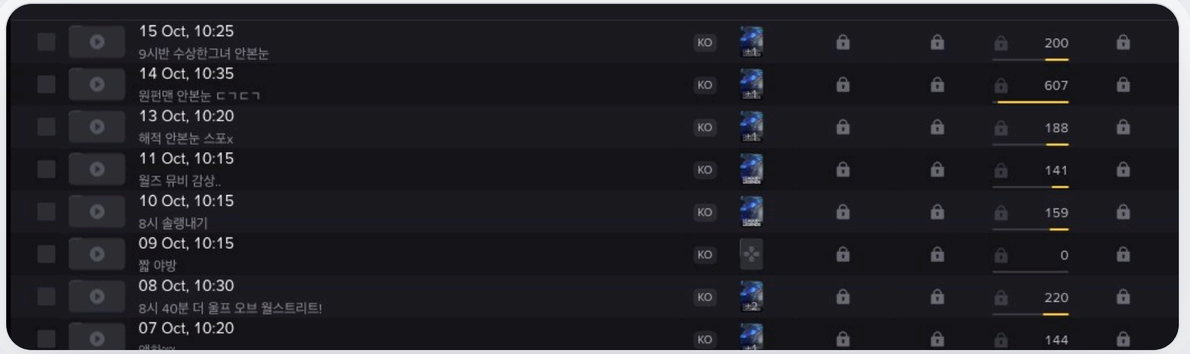

1st: Live creators and streamers

Less prep pressure. No more re-explaining the story to late viewers. No spoiler policing by hand.

2nd: Friends who want to watch together

Anyone who sets a time and still has someone running late.

Sources: CHZZK, 2026-10-16; SOOP stream titles via Streams Charts (“안본눈 스포x”), captured 2026-10-16

© 2026 BuildnWrite. All rights reserved.

Problem 1

Some of us have already seen it

In a watch party, people who have seen it and people who haven’t share one chat.
Streamers spend the show guarding it.

In the title

“스포금지” (no spoilers) written into a SOOP watch-along title

By hand

Mods are told to delete spoilers from chat

Our invite too

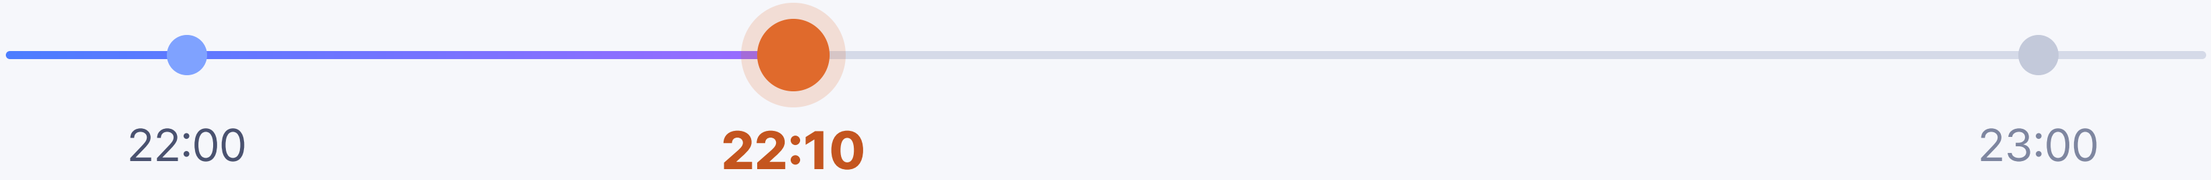

“If you’ve seen it already, no spoilers!”

Sources: SOOP stream titles via Streams Charts, 2026-09-30; Cohhilition chat rules

© 2026 BuildnWrite. All rights reserved.

Problem 2

Not everyone makes it at 22:00

A parent joins at 22:10 after putting the kids to bed.

Late joiners usually just leave.

Streamers keep re-explaining the story to every newcomer.

Friend A, interview 2026-10-16 (paraphrased)

© 2026 BuildnWrite. All rights reserved.

02 WHAT'S DIFFERENT

We spot spoilers by the scene a message talks about, not by when it was posted.

	Twitch	SOOP	YouTube Premieres	CHZZK	Prime Video X-Ray Recaps	Watch Party Host
Watch together	X	O	O	O	X ended 2024	O
① Recap for late joiners	X	△ live now	X	X	△ solo only	O from the video
Answers only from what has aired	X	X	X	X	X	O
② Spoilers blurred by scene	X	X	X	X	X	O
Anyone hosts YouTube like TV	X	X	X	X	X	O

Public sources as of 2026-10-16, some notices unverified. SOOP recap follows the live moment. Prime Video X-Ray Recaps work when watching alone; its Watch Party stopped new parties in 2024-04. CHZZK Clean Bot filters abuse, not spoilers.

SCREEN TOUR 1/3

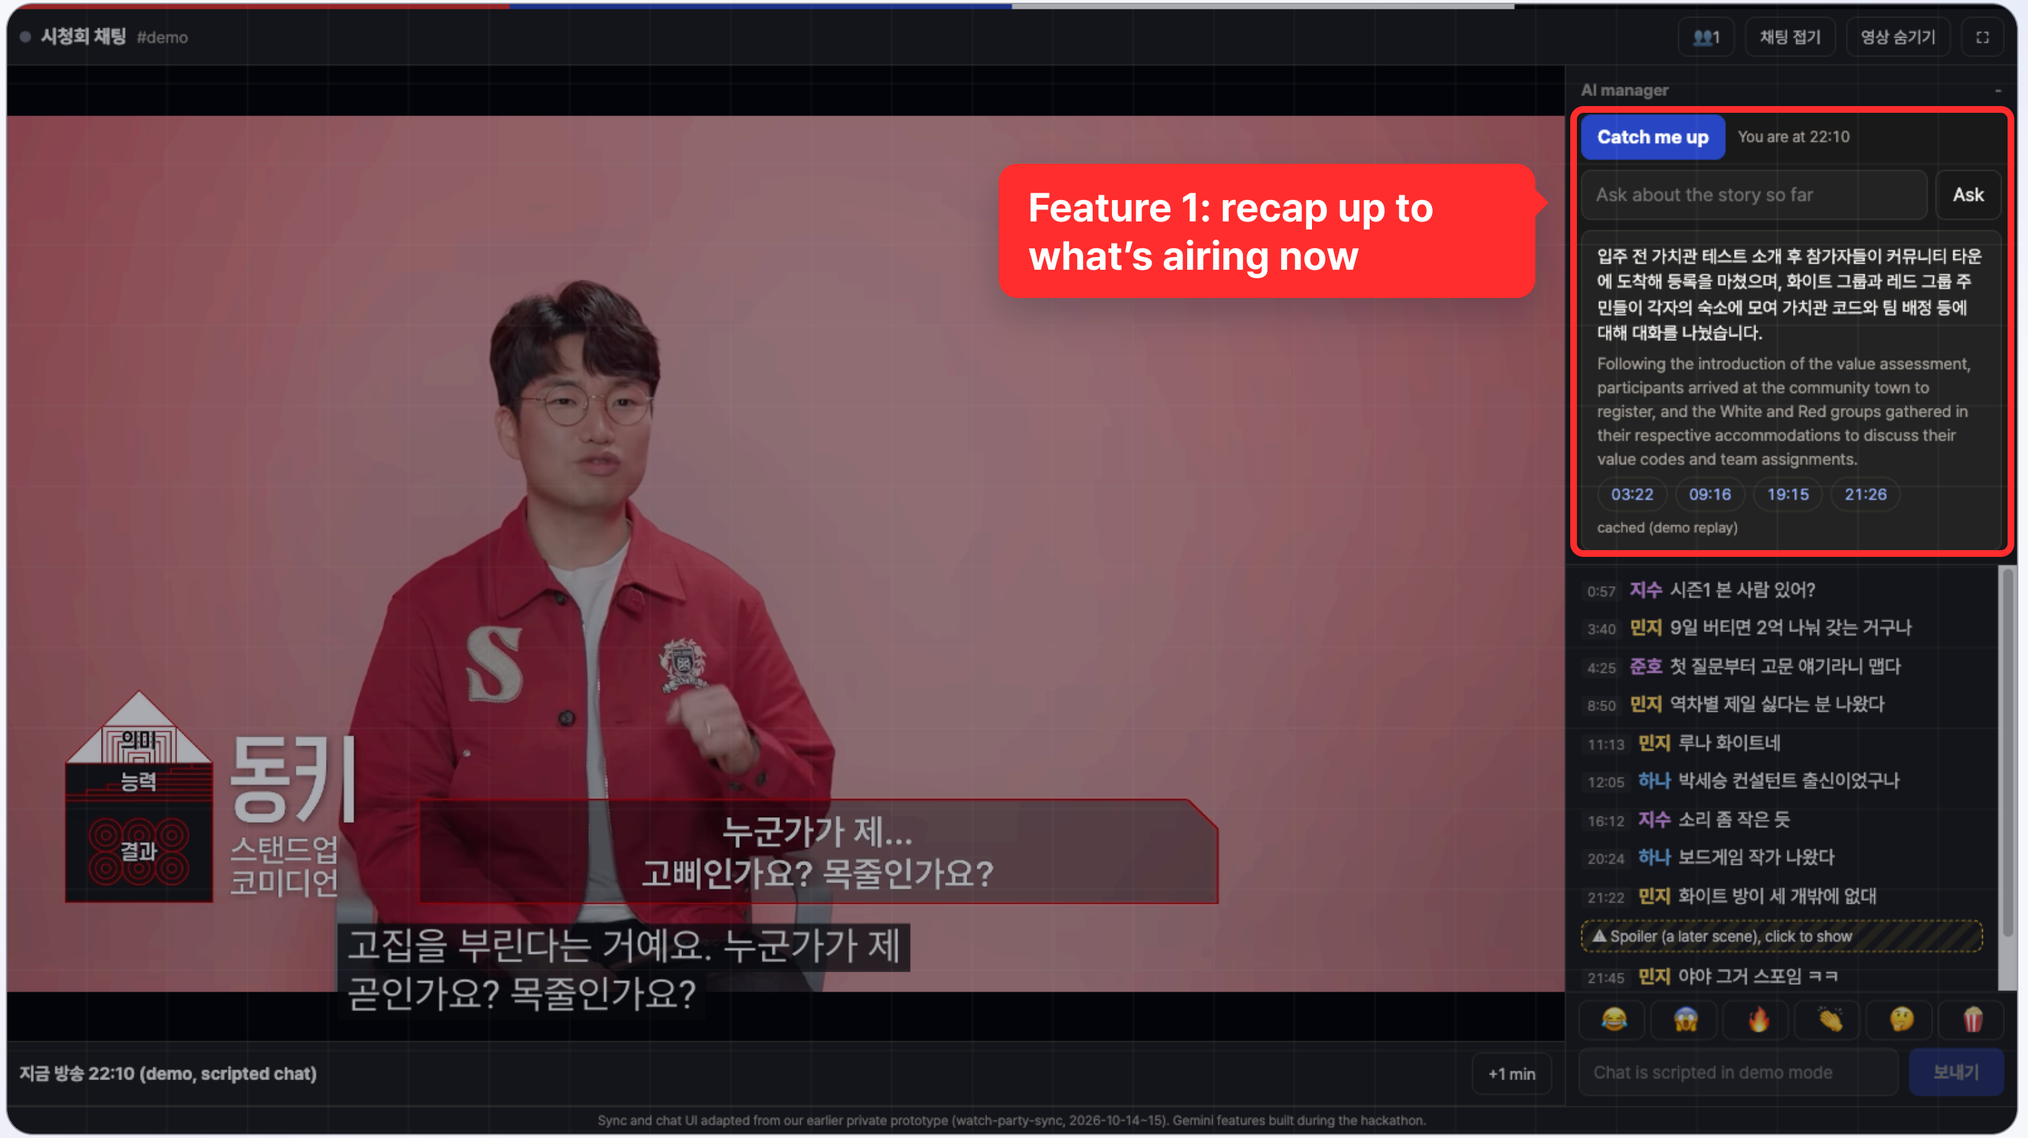

Like a TV: everyone sees the same scene

© 2026 BuildnWrite. All rights reserved.

SCREEN TOUR 2/3

Feature 1: recap up to what’s airing now

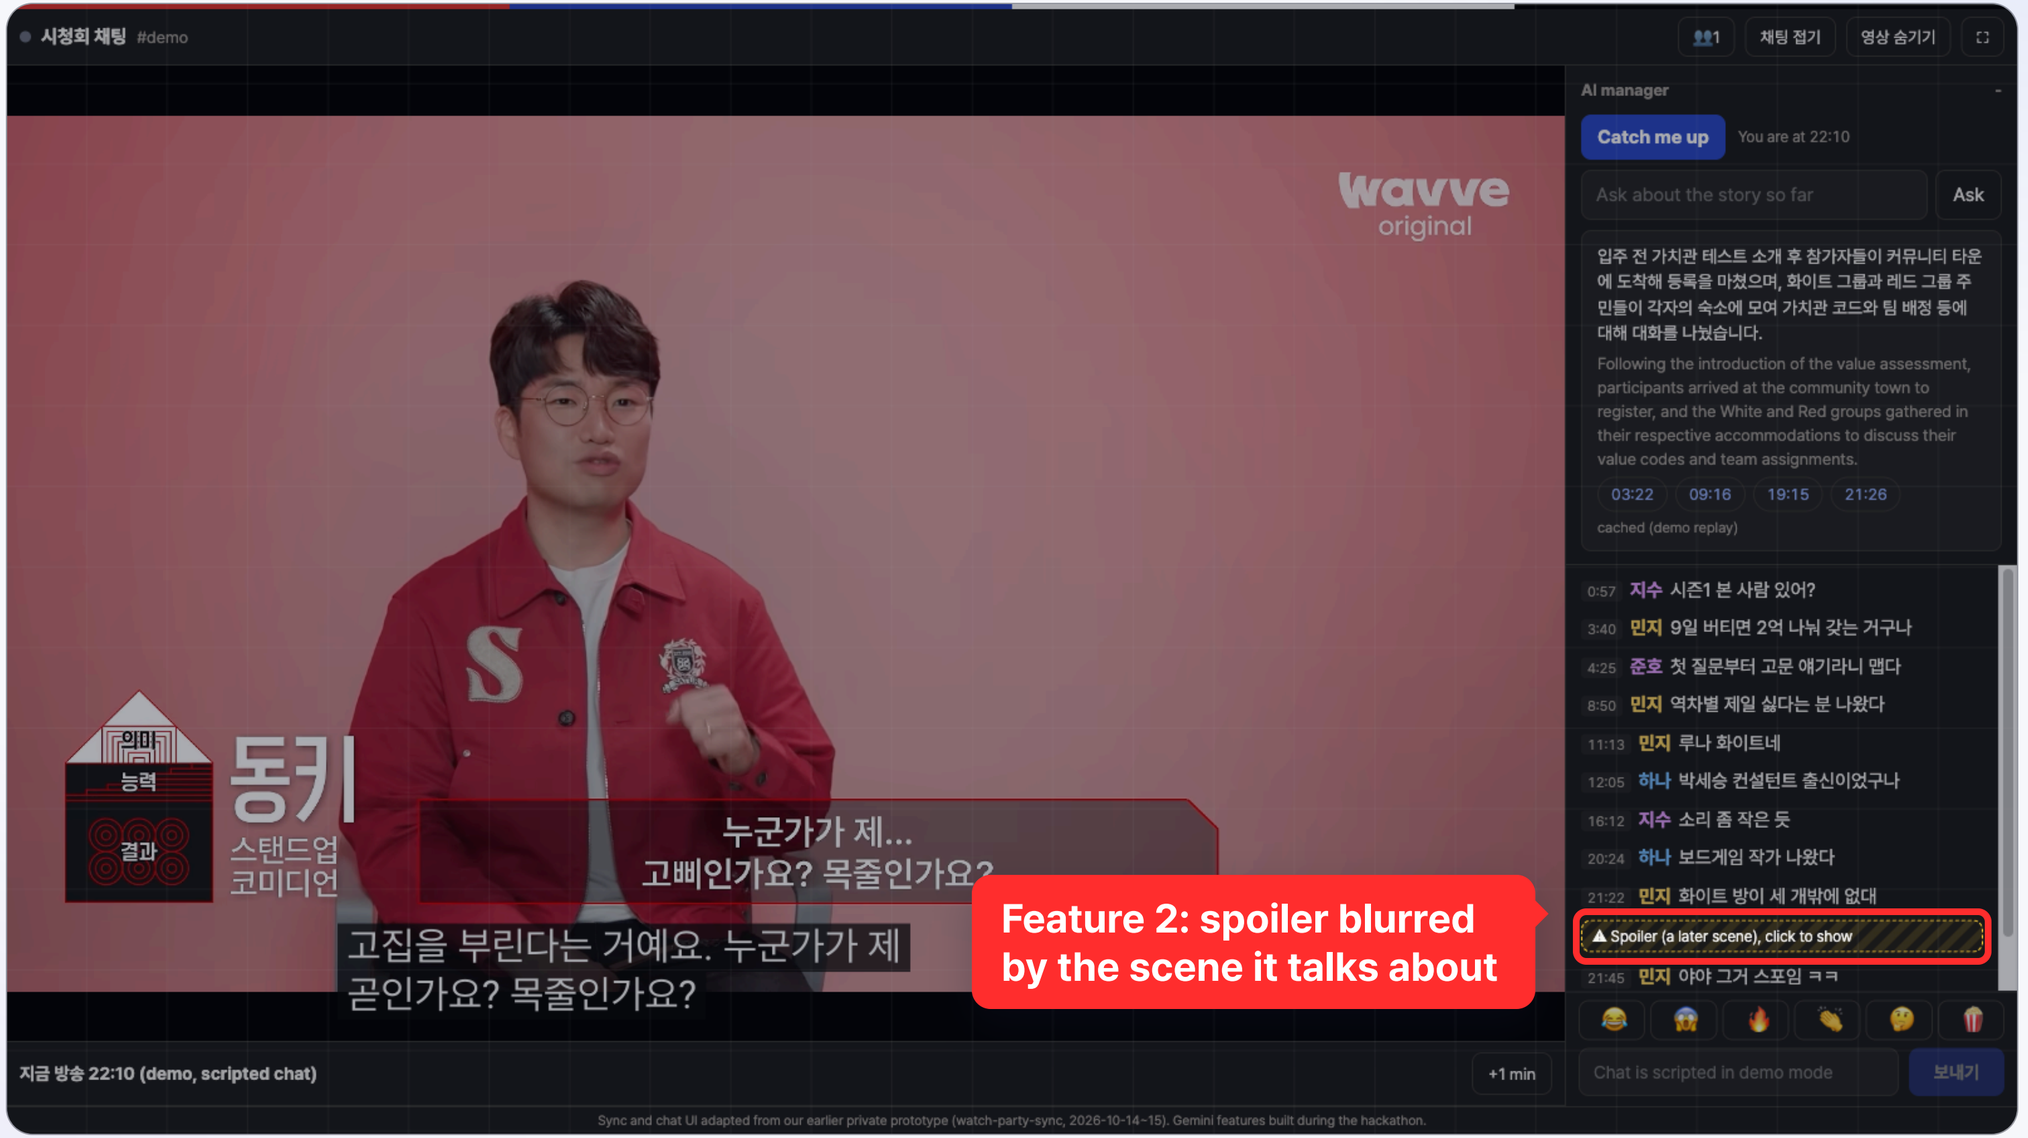

Live app, revision 00014, demo room, 2026-10-16

© 2026 BuildnWrite. All rights reserved.

SCREEN TOUR 3/3

Feature 2: spoiler blurred by the scene it talks about

Live app, revision 00014, demo room, 2026-10-16

© 2026 BuildnWrite. All rights reserved.

FEATURE ① LATE JOINERS

Join late, get caught up to what has aired

“Catch me up” recaps the story up to now

Korean and English, with time chips that cite scenes

From the Argon scene log, 7.2 s

Live app, demo room, 2026-10-16

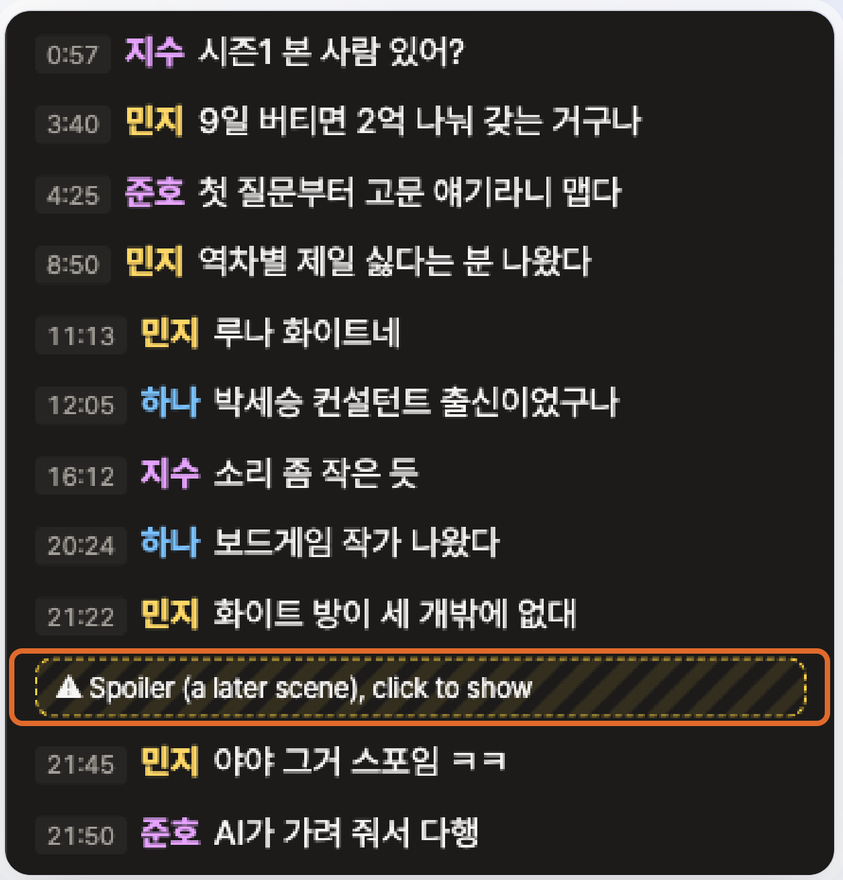

© 2026 BuildnWrite. All rights reserved.

FEATURE ② SPOILER BLUR

Spoilers get blurred the moment they’re posted

A rewatcher types about a scene that hasn’t aired yet. Gemini finds that scene and **blurs the message as it arrives.**

Want to see it? **Click to reveal, your choice.** The blur clears by itself when that scene airs.

Blurred on arrival. Click to show. Friends reply: “야야 그거 스포임”, “AI가 가려 줘서 다행”

Live app, demo room, 2026-10-16

© 2026 BuildnWrite. All rights reserved.

03 DEMO

Demo

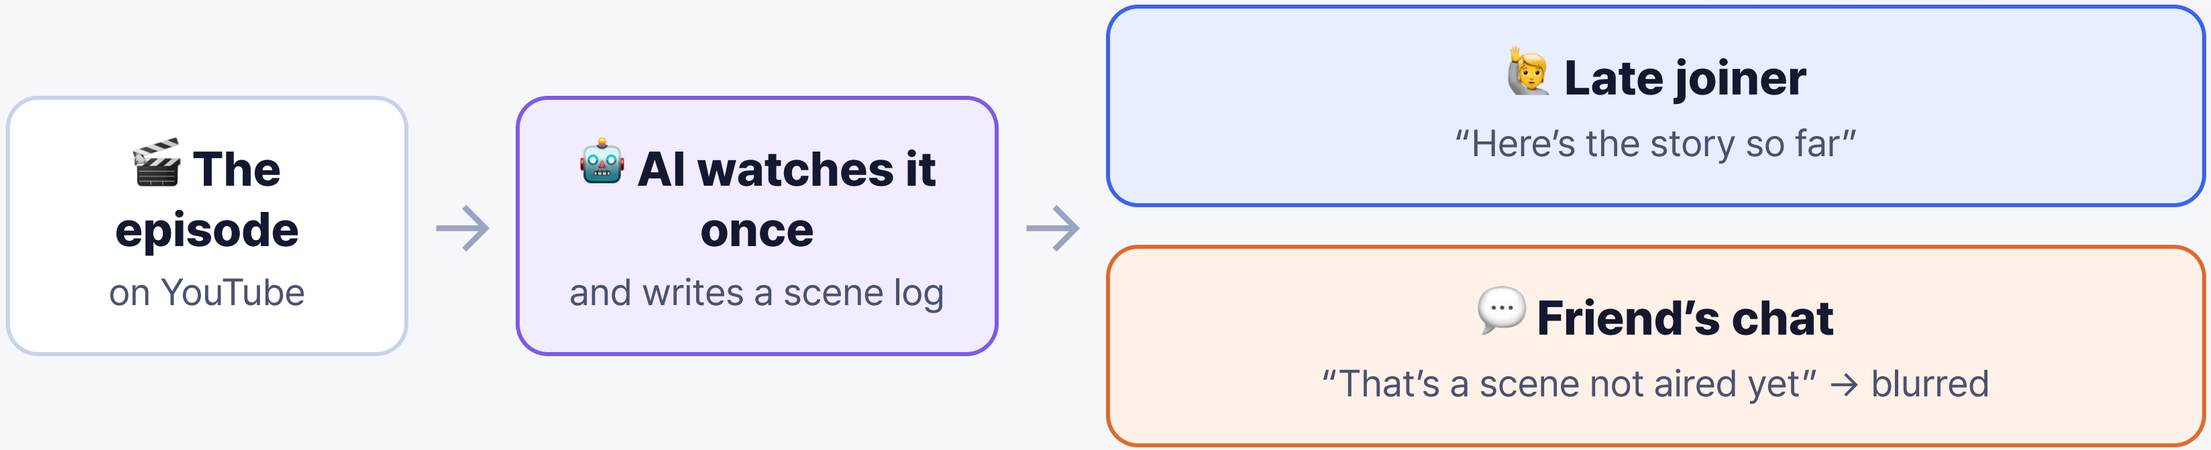

Two features: ① catch up a late joiner, ② blur a spoiler.

Video plays here (Google Drive)

04 HOW IT WORKS

How it works, in plain words

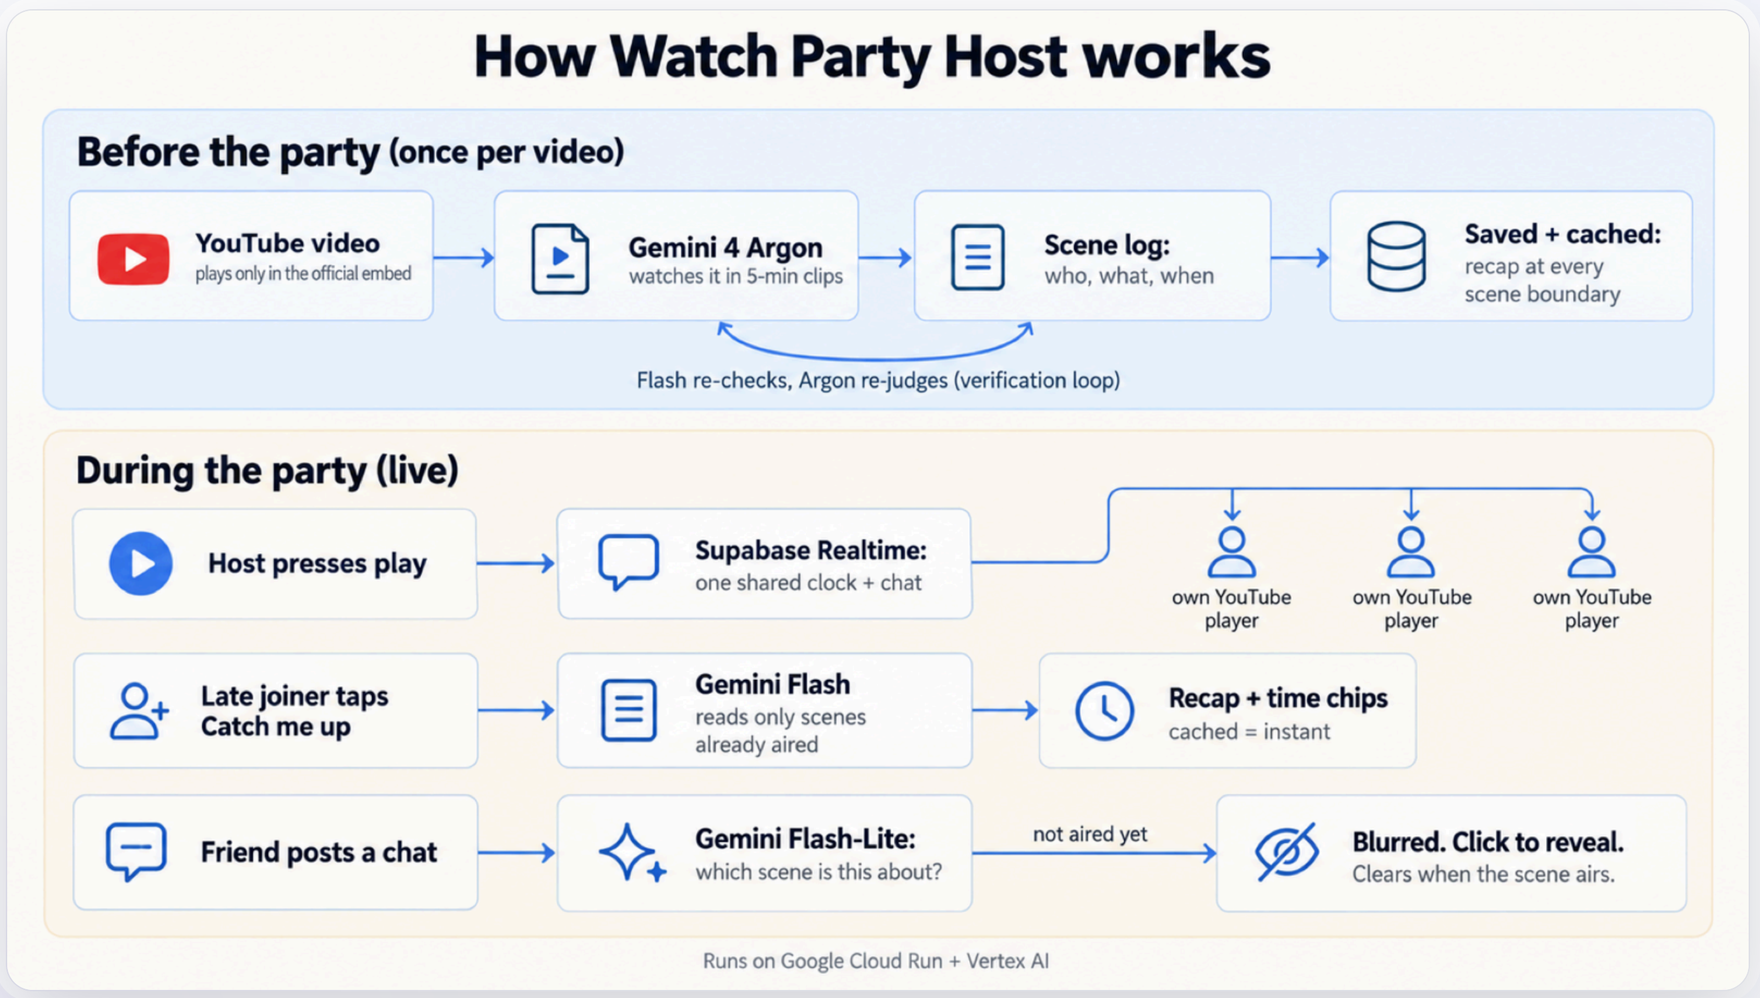

Everyone watches the same scene at the same time. The AI only uses what has already aired.

Technical flow on the next slide

© 2026 BuildnWrite. All rights reserved.

04 HOW IT WORKS

Technical flow

Source: app code and Cloud Run deployment, 2026-10-16; diagram drawn with GPT

© 2026 BuildnWrite. All rights reserved.

04 COPYRIGHT-SAFE BY DESIGN

Copyright-safe by design

Everyone watches on the original platform, with their own rights: the official YouTube embed.

We share only which minute you're on, plus the chat.

No licensed content needed. **Anyone can host, like a TV.**

© 2026 BuildnWrite. All rights reserved.

04 HOW WE MADE IT INSTANT

How we made it instant

We pre-compute 18 scene boundaries × 3 questions and cache the answers.

0.2 s

Catch me up recap

Cached. A first question takes 7.8 to 9.7 s.

0.3 s

Spoiler check

Cached. A new chat line takes 1.3 to 2.0 s.

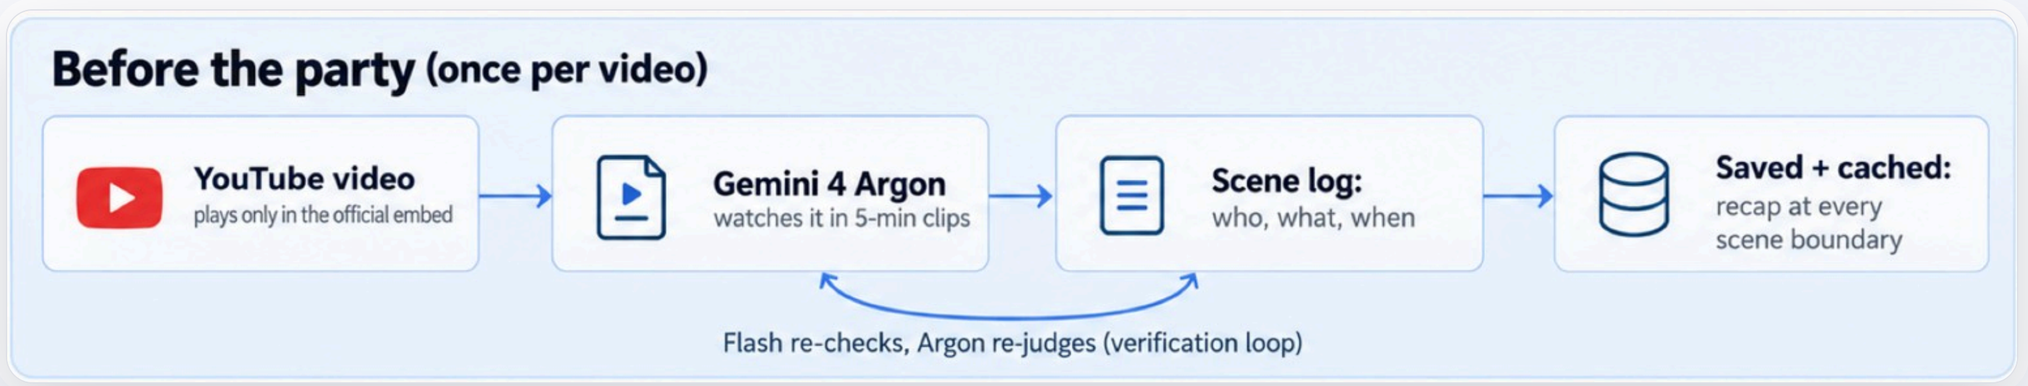

Next: a keyword index from the scene log → **milliseconds**; the model only confirms.

Numbers: app session report, deployed app measured 2026-10-16

© 2026 BuildnWrite. All rights reserved.

04 BUILT TO SCALE

Built to scale

Each video is processed once, and every room reuses it.

More viewers do not add scene-log cost.

The costly part is checking chat; a keyword index cuts it.

From our technical flow: “Before the party (once per video)”

© 2026 BuildnWrite. All rights reserved.

05 NEXT

Tonight, then creators

🍿

Tonight 22:00

Our friends watch The Community 2 with it.

📺

Next

An AI manager for creators' watch-alongs.

🎓

Then

An agent that answers my own live-lecture chat.

Join late. Still watch together.

In production, Flash writes the scene log and Argon only judges when Flash is unsure; a keyword index blurs spoilers in milliseconds.

05 RETROSPECTIVE

What we’d do differently

70 / 20 / 10

Planning / pitch / building

How we spent the day.

Right model, right job

Real-time needs Flash and Flash-Lite. Argon for the scene log was overkill. **Next time Flash writes, Argon judges.**

Use Argon more

I set up permissions the way my existing harness expected, so Argon couldn’t write code for me. I wish I had used Argon more.
